~~CONFIDENTIAL~~26th May, 1959.COCOM Document No. 3538BCOORDINATING COMMITTEEMEMORANDUM BY THE ITALIAN DELEGATIONEXCEPTION REQUEST FOR THE EXPORT OF BEARINGS TO HUNGARY

The Italian authorities have received an application for a licence concerning the export to Hungary of 3 bearings covered by Item 1601, whose value is \$ 3,180.

These are <sup>Spherical</sup> ~~3~~ thrust roller bearings, # P0440 Type, 440 x 780 x 206, intended to be fitted onto the swivelling pivot of a floating crane.

In view of the very limited number and slight strategic significance of these items, which are for purely civilian use, the Italian authorities would like to grant the licence and are submitting the present request under the exceptions procedure set out in Document 1473, Annex A., paragraph (b).

This case is similar to the export to Russia contemplated previously, when the Italian Delegation on the 10th January, 1959, submitted an exception request (in COCOM Document 3360) concerning 4 bearings of higher dimensions. The Committee authorised that export on the 13th April, 1959 (COCOM Document 3491). Owing, however, to the length of time taken by some Delegations to give their replies, the foreign buyer had withdrawn his order.

In view of the foregoing, and taking account of the fact that the Italian exporting firm have asked the competent authorities to handle the matter urgently so that this order will not be lost in a similar way, the Italian Delegation would be glad if other Delegations would give their views as soon as possible.
